

Instructor Bio: **Gerald Hayes**

Gerald Hayes has had dogs in his life as long he can remember. He discovered quickly the power of the human / dog bond and he knew he would always have a dog in his life! He feels that learning is life-long and he has been blessed to work with phenomenal trainers in many different areas. These areas include obedience, scent work, protection training, showing, and a large variety of other dog sports.

Personal development is an area of his life that **Gerald** focuses on and feels it is a journey that never ends. The last two years has had a direct effect on his experiences with dogs and people. **Gerald** realized that dogs are an unbiased mirror and that provides great insight into their owners. He has seen great results of working directly with both the dog and handler, positively affecting both the dog's behavior as well as bringing enlightenment to the owner. His vision of bringing dog training and life coaching together has been realized and the results have been very rewarding!

Gerald is the father to 1 son, presently owns 3 dogs, and is a Doberman Pinscher breeder. He is the founder of **Coaching With Gerry**, providing dog training services combined with life coaching.

We are so excited to have **Gerry** share his expertise with us, making a difference to our own dogs!
